20+ yrs Architecting Systems at Scale	20K RPS Peak Platform Throughput Shipped	30 Engineers Directed Across 4 Teams	11+ yrs Running an Independent Practice
---	--	--	---

SUMMARY

Principal-level software architect with 20+ years designing and scaling systems for organizations including Salesforce and Target, now at the leading edge of agentic AI tooling — authoring MCP servers, plugins, hooks, and multi-agent orchestration frameworks that change how engineering teams ship software. Track record architecting platforms that scale to 10,000–20,000+ requests per second, directing technical strategy across 4 product teams and 30 engineers, and founding an independent consultancy advising growth-stage companies on system architecture. Deep range across distributed systems, cloud infrastructure, and emerging LLM-based agent design, paired with a builder's instinct for finding the bottleneck and fixing the foundation.

CORE COMPETENCIES

Agentic AI & LLM Tooling: Claude Code, Cursor AI, Codex, MCP Servers, Mastra.ai, LangChain/LangGraph, AWS Bedrock AgentCore, RAG

Cloud & Platform Engineering: AWS, Cloudflare, Terraform, Nomad, Next.js, Docker-based CI/CD

Architecture & Data: Domain-Driven Design, System Design, GraphQL, gRPC, Kafka, PostgreSQL, MongoDB, Cassandra, Elasticsearch

Languages: Python, TypeScript/JavaScript, Java, Kotlin, Go, Groovy, SQL, C

Frameworks & Practices: Spring Boot, Micronaut, Ratpack, Node.js, Agile Development, CI/CD, Performance Testing

PROFESSIONAL EXPERIENCE

Principal Engineer, Web Platforms — Salesforce

Jan 2023 – Present

Minnesota, United States

- Architect agentic coding workflows across Claude Code, Cursor, and Codex — authoring MCP servers, plugins, skills, hooks, and subagent orchestration adopted across engineering teams.
- Build multi-agent automation pipelines with Mastra.ai, LangChain/LangGraph, and AWS Bedrock AgentCore; integrate Slack Bolt bots with the OpenAI SDK for workflow automation.
- Designed a website telemetry platform for salesforce.com scaling to 10,000 requests/second.
- Designed authentication and authorization infrastructure using OpenID Connect (OIDC) and lead-generation applications capturing marketing signals across Salesforce properties.

Founder & CEO — Maas Technologies LLC

Jan 2015 – Present

Independent Consultancy · maas.build · North America

- Help growth-stage companies build backend systems that scale — focusing on system architecture and application design decisions that determine whether a product handles 10x growth or breaks under it.
- Engage directly with founders and engineering leaders to find bottlenecks, fix foundations, and keep engineering pace aligned with business ambition.

Principal Software Engineer, Financial Retail Systems — Target

Mar 2020 – Jan 2023

Remote

- Owned architecture, design, and technical decisions across 4 product teams and 30 engineers.
- Led end-to-end rebuild of a B2B e-commerce gift card platform and the RedCard application architecture.
- Rebuilt bank account validation applications; redesigned application statistics APIs and decision-reporting applications.
- Redesigned the guest account forward cache using GraphQL.

Principal Software Engineer, Commerce — Target

Aug 2017 – Mar 2020

Greater Minneapolis-St. Paul Area

- Led redesign of shopping cart applications from monolith to microservices, scaling shopping cart APIs to 20,000 requests/second.
- Designed platform and guest-facing omnichannel shopping cart/payment APIs; built DevOps pipelines using Nomad and Terraform.
- Grew the engineering team from 3 to more than 10 engineers.

Lead Software Engineer — Target

Aug 2015 – Aug 2017

Greater Minneapolis-St. Paul Area

- Led API design and data modeling for platform services.

EARLIER CAREER

Object Partners, Inc. — Senior Consultant (Target)

Dec 2014 – Aug 2015

Capella Education Company — Senior Software Developer

Apr 2013 – Dec 2014

Lead application architect for campus & social products; led the Liferay 6.0→6.1 upgrade and Spring/SOAP-to-REST refactor.

Oracle — Senior Software Engineer / Build & Tools Engineer

Oct 2008 – Apr 2013

Built application frameworks, security-policy tooling, and CI/CD systems (Cruisecontrol, Hudson) running thousands of builds per month.

UnitedHealth Group — IT Architecture Analyst

Nov 2006 – Oct 2008

Aero Systems Engineering — Software Engineer

Jun 2004 – Jun 2006

Real-time turbine engine test-monitoring systems in C/C++.

City of Maplewood — Parks and Recreation Commission Member

2010 – 2012

Made policy recommendations to the City Council.

EDUCATION

MS, Software Engineering — University of Minnesota–Twin Cities

2011 – 2013

BS, Computer Engineering and Computer Science — University of Wisconsin–Madison

1999 – 2004

CERTIFICATIONS & PUBLICATIONS

Certifications: AWS Certified Solutions Architect – Associate; Retrieval Augmented Generation (RAG)

Publications: “Method and System for Centralized Checkout Process”; “Reddit Architecture and Extension Proposal”

Languages: French (Elementary)
